Our main ingredient

Most people know a little about Aloe Vera Gel, but not the whole story. We know it's good for you, natural and helps with burns. How many times have you come back from the beach with a bad sunburn — then, someone finds an Aloe Vera Leaf, breaks it open and rubs the gel on your burn? Feels better, right?

Why Aloe?

Over the last 35 years we have been asked the same question over and over, “why does Aloe Up work and feel so much better than other brands?” Our answer is always the same — “It’s the Aloe Vera Gel.” Most sunscreens and moisturizers are based with water or mineral oil and manufacturers may put a drop or two of Aloe Vera in there for marketing purposes. A drop or two won’t do the trick, you must put in at least 20% by volume, of pure Aloe Vera Gel, to get the true benefits of Aloe. Aloe Up uses at least 35%, which is the highest in the industry. Our Aloe is grown and processed in Harlingen, Texas which is the top region in the world for growing the most effective strains of Aloe Vera.

The Science of Aloe Vera

Aloe Vera Gel will stimulate your immune system to naturally regenerate skin cells making it a great moisturizer and burn relief product, Aloe also reduces swelling and stops itching. What most people don’t know is Aloe has a similar PH to your skin and is a great penetrator. In all of our formulas, we start with a base of Aloe Vera to carry the sunscreen down into your pores so it doesn’t sit on top of your skin and feel greasy or wash off easily. The reason why Aloe Up works better, feels better, and lasts longer is because of Aloe Vera Gel.
